FROM OUR FEEDBACK SESSIONS

What performance staff told us.

Three findings that changed how we build Mylin.

FINDING 01 · THE FIRST NUMBER OF THE DAY

"How many players do I have available?"

A performance lead at a professional club starts with the medical meeting, then this one question. They want **three numbers**, and the rest can wait.

Available	Injured	On hold
READY TO TRAIN	OUT	MANAGED

FINDING 02 · FAMILIAR WINS

"Oh, a new calendar I have to learn again."

Busy staff drop any tool that makes them relearn what they already know. So we're rebuilding Mylin's calendar to look like the **Google or Outlook calendar** your staff already use, with everything two clicks away.

FINDING 03 · THE STAFF DECIDE

"You can never build a platform that will give us a final decision."

Our job is to show what the data says, clearly. Who plays, who rests and who is ready to return **stays with your staff.**

NEXT: SUNDAY

What academies, students and smaller clubs told us.

Work in sport? Tell us the first thing you check each morning, or request early access at **mylin.pro**.
